

BOND UNIVERSITY

MASTER OF BUILDING SURVEYING

MASTER OF BUILDING SURVEYING

INDUSTRY OVERVIEW

The building surveying profession employs experts who specialise in fields such as building legislation, technical codes and construction standards. Working alongside similar professionals including architects, engineers and project managers, building surveyors' skills and services are in high demand.

Duration: Minimum 3 semesters, flexible part-time and intensive mode available

Starting: January, May, September

ENTRY REQUIREMENTS

Successful completion of any undergraduate degree, or qualifications and / or relevant professional experience deemed equivalent by the Institute's Director.

PROGRAM DESCRIPTION

The Master of Building Surveying at Bond University offers you the chance to increase your knowledge in the field of building surveying, while studying with world-class academics and experienced practitioners in one of Australia's most environmentally friendly buildings.

The program comprises four specialist subjects plus four shared core subjects. Completion of a further four postgraduate elective subjects, selected from the suite offered by the Institute of Sustainable Development & Architecture, allows students to graduate with a Master of Building Surveying.

PROGRAM STRUCTURE - 12 SUBJECTS

This program allows students to exit after two semesters (4 subjects) with a Graduate Certificate, after two semesters (8 subjects) with a Postgraduate Diploma, or complete all three semesters (12 subjects) for a Master's degree.

Graduate Certificate in Building Surveying (4)

- Building Controls and Regulation
- Development Assessment
- Fire Engineering
- Structures and Soil Mechanics **OR**
Commercial Construction and Engineering

Postgraduate Diploma in Building Surveying (8)

In addition to the subjects listed for the Graduate Certificate, students must complete the following:

- Building Pathology and Forensic Engineering
- Expert Witness and Dispute Resolution
- Integrated Project
- Sustainable Refurbishment and Retrofit

Master of Building Surveying (12)

In addition to the subjects listed for the Graduate Certificate and Postgraduate Diploma, students must complete four elective subjects. Students may complete any four postgraduate subjects from the suite offered by the Institute of Sustainable Development & Architecture.

PROFESSIONAL OUTCOMES

Graduates of the Master of Building Surveying will be able to practice as accredited building surveyors and certifiers. The program has been designed in consultation with the Australian Institute of Building Surveyors (AIBS) to ensure that the material covered is appropriate for people engaged in this field. Through this consultation graduates are assured that their qualifications meet the requirements of the profession. It is anticipated that the program will be fully accredited by both the AIBS and the Building Professionals Board (NSW).

PROFESSIONAL RECOGNITION

This program has international accreditation with the Royal Institution of Chartered Surveyors (RICS).
